1. Read the passage given below and answer the questions that follow :

One of the most difficult things in life is to find a way of behaviour that is not dictated by circumstances. Circumstances and people dictate or force you to behave in a certain way. The way that you conduct yourself, the way you eat, the way you talk, your moral, "your ethical behaviour depends on where you find yourself" and so your behaviour is constantly varying, constantly changing. This is so when you speak to your father, your mother or to your servant—your voice, your words, are quite different. The ways of behaviour are controlled by environmental influences, and by analysing behaviour you can almost predict what people will do and will not do.

- (ii) How do circumstances affect people ?
- (iii) Why is one's behaviour constantly changing ?

1. Read the passage given below and answer the questions that follow :

Do not study for too long at a stretch, so long as the mind acts with ease, it may be allowed to continue working, but if we find that it moves slowly and extra efforts are needed to keep the attention fixed, it is far better to break off and take a walk or some other recreation than plodding on until one feels completely exhausted. To continue forcing the mind to work is likely to lead to injurious results and may end in nervous breakdown. Violent exercise which may cause bodily harm and weariness, is not what is wanted, for with a tired body, a little mental peace is possible. Useful exercise as a change for study should give energy, not exhaust it.

Questions :

- (ii) What danger is there in working with a tired mind ?
- (iii) What advice does the writer give regarding exercise ?

1. Read the passage given below and answer the questions that follow :

For a student, walking is preferable to all other exercises. The advantage of this mode of exercise is that it is simple. The apparatus is at hand complete. You need not wait for the importation of machinery. It is in the open air that the lungs can at once receive the pure air of heaven and the eyes gaze upon hill and dale, upon trees and flowers, upon the objects animate and inanimate. The very objects of sight and sound cheer the mind and raise the spirit. Another advantage of walking is that you can

have a friend to walk with and unbend the mind by pleasant conversation. Try once the method of walking with a friend regularly for a few weeks and you will be surprised at the marvellous results. Trees give shade for the benefit of others, while they themselves stand in the sun and endure the scorching heat. They produce fruit

which others eat. The character of a good man is like that of trees. What is the use of this perishable body if it is not used for the benefit of mankind. The more sandalwood is rubbed, the more scent it gives. The more sugarcane is peeled and cut into pieces, the more juice it produces. The more gold is burst, the more brightly it shines. Noble people do not lose their qualities even by losing their lives. Come what may, those who tread on the right path will not set foot on any other. Life itself is unprofitable for a man who does not live for others. To live for the sake of living one's life is to live a worthless life.

SECTION – A**(Unseen Comprehension)**

1. Read the passage given below and answer the questions that follow :

Living on the earth is rather like being at the bottom of a sea hundreds of miles deep. Without atmosphere, there would be no people or animals, birds or fishes, trees or plants. There would be no weather, winds or rain. And there would be no blue sky, no rosy sunsets or dawns. Fire would be impossible without air, for burning is the union of oxygen with whatever is burned. Nor would there be any noise, which is the vibration of air-waves against our ear-drums.

4802/(Set : D)

By day the atmosphere serves as a great sun-shade. It protects the earth from the full force of the sun by absorbing most of its harmful radiation. But for the atmosphere, the daytime temperature would rise to 230 degrees Fahrenheit hotter than boiling water. By night, the air acts like a giant green house. It imprisons the heat collected during the day and prevents it from spreading into space.

Questions :

1 × 5 = 5

- (i) What is living on the earth like ?
- (ii) For which creatures is atmosphere needed ?
- (iii) What are the other purposes for which atmosphere is needed ?
- (iv) Why is atmosphere needed for noise ?
- (v) How does atmosphere serve as great sun-shade ?

There are several reasons for a headache. Physical, emotional and mental factors which include anxiety and tension are a few. Sometimes, headache can be a signal of an underlying disease. More than medicines, yoga

therapy eminently suits any need. Yoga is a comprehensive mode of culturing the body and the mind. Using an "Integrated Approach of Yoga", the yoga research centres have been able to cure some tough headaches. This approach includes breathing asanas, pranayama, meditation and devotional sessions.

Yogasanas, especially the ones imitating the natural postures of animals, have a tremendous tranquillizing effect, without having to depend on common drugs. Dhyana and Samadhi culture relax the mind.
